BAN ON ABORTIONS FOR SEX SELECTION AND GENETIC ABNORMALITIES

Model Legislation & Policy Guide
For the 2010 Legislative Year

AMERICANS UNITED FOR LIFE

Changing Law to Protect Human Life, State by State
INTRODUCTION

In recent years, the practice of sex-selective abortions has drawn increasing attention worldwide. Sex-selective abortions are abortions undertaken to eliminate a child of an undesired sex. The targeted victims of such abortions are overwhelming female. The problem is so severe in some countries that, in 2005, the United Nations Population Fund (UNFPA) termed the practice “female infanticide.” The practice of sex-selective abortions is common in some Asian countries including China and India, but it is also being practiced in the United States, often by people who trace their ancestry to countries that commonly practice sex-selective abortions.

Lawmakers have begun focusing more attention on the problem of sex-selective abortions. Currently, three states, Illinois, Oklahoma, and Pennsylvania\(^1\), prohibit sex-selective abortions. Moreover, the “Susan B. Anthony and Frederick Douglass Prenatal Nondiscrimination Act of 2009” has been introduced in Congress and seeks to prohibit the practices of both sex-selective and race-based abortions.\(^2\)

Prenatal testing is becoming increasingly common and many diagnostic tests are intended to provide parents and healthcare providers with information about an unborn baby's health and development (including the child’s sex). Currently, prenatal testing to identify and diagnose potential genetic abnormalities or disorders is commonly used in cases where a pregnant woman:

- Is age 35 or older, because she is generally at higher risk for having a child with a chromosomal abnormality;
- Has a family history of an inherited condition such as Duchenne muscular dystrophy;
- Whose ancestry or ethnic background means that she might have a higher chance of an inherited disorder such as sickle cell anemia, thalassemia, or Tay-Sachs disease; or
- Is screened for common genetic disorders such as spina bifida and Down syndrome.

Two diagnostic procedures are common in prenatal testing. Amniocentesis involves testing a sample of amniotic fluid from the womb, while chorionic villus sampling (CVS) involves taking a tiny tissue sample from outside the sac where the child is growing.

Prenatal testing can be a valuable tool for diagnosing and treating conditions that threaten the health or life of the mother, the child, or both. However, in some cases and despite documented error rates for the testing, it is used as a precursor for aborting a child of an undesired sex or with potential genetic abnormalities or defects. For example, recent studies have indicated that more

\(^2\) HR 1822 (2009).
than 90 percent of unborn children diagnosed with Down syndrome are aborted.\(^3\)

Clearly, this chilling slide toward eugenics – specifically, altering or eliminating certain hereditary characteristics – must be confronted. Notably, one of the most prominent American supporters of eugenics was Margaret Sanger, the founder of Planned Parenthood.

In response, AUL has developed model legislation banning abortions done solely for reasons of sex-selection or genetic abnormalities such as Down syndrome. For more information and drafting assistance, please contact AUL’s Legislative Coordinator at (312) 568-4717 or Legislation@AUL.org.

Section 1. Short Title.

This Act may be cited as the “Abortion Act of [Insert appropriate year].”

Section 2. Legislative Findings.

The [Legislature] finds and declares the following:

(a) In regard to sex-selective abortion:

(1) A sex-selective abortion is used to prevent the birth of a child of an undesired sex. The victims of sex-selective abortion are overwhelmingly female.

(2) The United States, along with other countries, has petitioned the United Nations General Assembly to declare sex-selective abortion a crime against women.

(3) Countries such as India, Great Britain, and China have taken steps to end sex-selective abortion. For example, China and India do not allow doctors to reveal the sex of an unborn child.

(4) Women are a vital part of our society and culture and possess the same fundamental human rights as men.

(5) The United States prohibits discrimination on the basis of sex in various areas, including: employment, education, athletics, and health insurance.
It is undesirable to have a sex imbalance within a society, particularly when there is a shortage of women. Countries with high rates of male-preference have experienced ill effects due to an increasing number of young, unmarried men.

A large population of young, unmarried men can be a cause of increased violence and militancy within a society.

There is currently no evidence of a strong preference for males among American citizens. However, because of [Legislature]'s commitment to the equality of women and desire to never face a sex-imbalance problem, it considers sex-selective abortion to be a problem worthy of a prohibition.

In regard to abortion and Down syndrome:

1. Studies have revealed that unborn children that are diagnosed with Down syndrome or a potential for Down syndrome are disproportionately aborted.

2. Studies have found that between 70% and 100% of unborn children diagnosed with Down syndrome are aborted.

3. Recent years have seen an increase in the use of amniocentesis and other prenatal testing to diagnose potential health problems in unborn children.

4. Amniocentesis and other prenatal testing often give correct results, but also give many false-positives.

5. Roughly 1 in every 700 to 1,000 children is born with Down syndrome.

6. Down syndrome is not considered a severe disability.

7. In various circumstances, the United States prohibits discrimination against persons with Down syndrome.

8. In many situations, such as education, the United States requires that concessions be made for the benefit of persons with Down syndrome.
Persons with Down syndrome contribute to American culture and are a valuable part of our society.

Many persons with Down syndrome are able to maintain employment, obtain an education, and live with varying degrees of independence.

As technology advances and as medical treatments and educational methods improve, persons with Down syndrome will increasingly be self-dependent and productive citizens.

Persons with Down syndrome possess the same fundamental human rights as all other human beings.

In regard to abortion and genetic abnormalities:

1. Studies have revealed that unborn children who are diagnosed with a genetic abnormality or a potential for a genetic abnormality are often aborted.

2. Studies have found that between 70% and 100% of unborn children diagnosed with genetic abnormalities are aborted.

3. Recent years have seen an increase in the use of amniocentesis and other prenatal testing to diagnose potential health problems in unborn children.

4. Amniocentesis and other prenatal testing often give correct results, but also give false-positives.

5. There are approximately 4,000 known genetic abnormalities.

6. The United States prohibits discrimination against persons with physical or mental deformities or handicaps in various circumstances, such as housing and employment.

7. In many situations the United States requires that concessions be made for the benefit of persons with physical or mental handicaps.

8. Persons with physical or mental deformities or handicaps contribute to American culture and are a valuable part of our society.

Ban on Abortions for Sex Selection
And Genetic Abnormalities 6 Americans United for Life
Many persons with physical or mental deformities or handicaps are able to support themselves financially, obtain an education, and live independently.

As technology advances and as medical treatments and educational methods improve, persons with physical or mental deformities or handicaps will increasingly be self-dependent and productive citizens.

Persons with physical or mental deformities or handicaps possess the same fundamental human rights as all other human beings.

Section 3: Definitions.

As used in this Act only:

(a) “Abortion” - The act of using or prescribing any instrument, medicine, drug, or any other substance, device, or means with the intent to terminate the clinically diagnosable pregnancy of a woman with knowledge that the termination by those means will with reasonable likelihood cause the death of the unborn child. Such use, prescription, or means is not an abortion if done with the intent to:

(1) save the life or preserve the health of an unborn child;

(2) remove a dead unborn child caused by spontaneous abortion; or

(3) remove an ectopic pregnancy.

(b) “Down syndrome” refers to a chromosome disorder associated either with an extra chromosome 21 (in whole or in part) or an effective trisomy for chromosome 21. Down syndrome is sometimes referred to as trisomy 21 syndrome.

(c) “Genetic abnormality” means any defect, disease, or disorder that is inherited genetically. The term genetic abnormality includes, but is not limited to: any physical disability, any mental disability or retardation, any physical disfigurement, scoliosis, dwarfism, Down syndrome, albinism, Amelia, or any other type of physical or mental abnormality or disease.

(d) “Incompetent” means any person who has been adjudged a disabled person and has had a guardian appointed for her under the [State Probate Act or other appropriate state law].
(e) “Minor” means any person on the age of eighteen (18) who is not and has not been married and has not been legally emancipated.

(f) “Physician” means any person licensed to practice medicine in this State. The term includes medical doctors and doctors of osteopathy.

(g) “Pregnant woman” means any female, including those who have not reached the age of 18 [or minors], who is in the reproductive condition of having an unborn child in the woman’s uterus.

(h) “Sex-selective abortion” means an abortion performed solely on account of the sex of the unborn child.

(i) “Unborn child” means the offspring of human beings from conception until birth.

Section 4. Prohibition Sex-Selective Abortion.

(a) No person may intentionally perform or attempt to perform an abortion with the knowledge that the pregnant woman is seeking the abortion solely on account of the sex of the unborn child.

(b) Nothing in this Section shall be construed to proscribe the performance of an abortion because the unborn child has a genetic disorder that is linked to the unborn child’s sex.

(c) If this Section is held invalid as applied to the period of pregnancy prior to viability, then it shall remain applicable to the period of pregnancy subsequent to viability.

Section 5. Prohibition on Abortion for Down Syndrome.

(a) No person may intentionally perform or attempt to perform an abortion with knowledge that the pregnant woman is seeking the abortion solely because the unborn child has been diagnosed with either:

(1) Down syndrome, or

(2) a potential for Down syndrome.

(b) If this Section is held invalid as applied to the period of pregnancy prior to viability, then it shall remain applicable to the period of pregnancy subsequent to viability.
Section 6. Prohibition on Abortion for a Genetic Abnormality.

(a) No person may intentionally perform or attempt to perform an abortion with knowledge that the pregnant woman is seeking the abortion solely because the unborn child has been diagnosed with either:

(1) a genetic abnormality, or

(2) a potential for a genetic abnormality.

(b) If this Section is held invalid as applied to the period of pregnancy prior to viability, then it shall remain applicable to the period of pregnancy subsequent to viability.

Section 7. Criminal Penalties

(a) Any physician or other person who intentionally or knowingly violates this Act is guilty of a [Insert class of felony].

(b) Any physician or other person who intentionally or knowingly performs or attempts to perform an abortion prohibited by this Act shall be fined not less than [Insert appropriate amount or possible range of fine], or be imprisoned [at hard labor] not less than [Insert appropriate time period or range], or both.

Section 7. Civil Penalties

(a) Any physician or person who intentionally or knowingly violates this Act shall be liable for damages, shall, if applicable, have his or her medical license suspended or revoked, and may be enjoined from such acts as provided in this Section.

(b) A pregnant woman upon whom an abortion has been performed in violation of this Act, the parent or legal guardian of the woman if she is an unemancipated minor as defined in [Insert citation(s) or other reference(s) to appropriate state statute], or the legal guardian [or conservator] of the woman if she has been adjudged incompetent under [Insert citation(s) or other reference(s) to state statute(s) relating to petition and hearing; independent evaluation] may commence a civil action for any knowing or reckless violation of the Act and may seek both actual and punitive damages. Such damages shall include, but are not limited to –
(1) money damages for all injuries, psychological and physical, occasioned by the violation(s) of this Act; and

(2) statutory damages equal to [Insert number] times the cost of the abortion performed in violation of this Act.

(c) Any physician who performs an abortion in violation of this Act shall be considered to have engaged in unprofessional conduct for which his or her [certificate or] license to provide healthcare services in the State of [Insert name of State] shall be suspended or revoked by the State of [Insert name of State Medical Board or other appropriate entity].

(d) A cause of action for injunctive relief against any physician or other person who had knowingly violated this Act may be maintained by the woman upon whom the abortion was performed or attempted to be performed in violation of this Act; any person who is the spouse, parent, guardian, conservator, or a current or former licensed healthcare provider of, the woman upon whom an abortion has been performed or attempted to be performed in violation of this Act; by the Office of the Attorney General of [Insert name of State]; or by a District [County or City Attorney] with appropriate jurisdiction. The injunction shall prevent the physician or person from performing further abortions in violation of this Act.

(e) Any physician or other person who knowingly violates the terms of an injunction issued in accordance with this Act shall be subject to [civil and/or criminal] contempt and shall be fined not less than [Insert appropriate amount or possible range of fine], or be imprisoned [at hard labor] not less than [Insert appropriate time period or range], or both.

[Drafter’s Note: If only civil contempt is selected as the appropriate remedy for failure to comply with a validly-issued injunction, then any reference(s) to imprisonment or other criminal penalties should be removed from subparagraph 7(e).]

(a) Any woman upon whom an abortion in violation of this Act is performed or attempted may not be prosecuted under this Act for a conspiracy to violate this Act or otherwise held criminally or civilly liable for any violation(s).

(b) In any criminal proceeding or action brought under this Act, any woman upon whom an abortion in violation of this Act is performed or attempted is entitled to all rights, protections,
and notifications afforded to crime victims under [Insert citation(s) or other reference(s) to state law(s) or administrative policies associated with the state’s Victim-Witness Protection or similar program].

(c) In every civil proceeding or action brought under this Act, the anonymity of the any woman upon whom an abortion is performed or attempted shall be preserved from public disclosure unless she gives her consent to such disclosure. A court of competent jurisdiction, upon motion or sua sponte, shall issue orders to the parties, witnesses, and counsel, and shall direct the sealing of the record and exclusion of individuals from courtrooms or hearing rooms, to the extent necessary to safeguard her identity from public disclosure. In the absence of written consent of the woman upon whom an abortion has been performed or attempted, anyone who initiates a proceeding or action under Section 7 of this Act shall do so under a pseudonym.

Section 9. Construction.

(a) Nothing in this Act shall be construed as creating or recognizing a right to abortion.

(b) It is not the intention of this Act to make lawful an abortion that is currently unlawful.

Section 10. Severability.

Any provision of this Act held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to give it the maximum effect permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event such provision shall be deemed severable here from and shall not affect the remainder hereof or the application of such provision to other persons not similarly situated or to other, dissimilar circumstances.

Section 11. Right of Intervention

The [Legislature], by joint resolution, may appoint one or more of its members, who sponsored or cosponsored this Act in his or her official capacity, to intervene as a matter of right in any case in which the constitutionality of this law is challenged.

Section 12. Effective Date.

This Act takes effect on [Insert date].
STATE OF THE STATES: WHERE ARE WE NOW?

Sex-Selection Abortion Bans

Three states ban abortions targeted toward the gender of the child: IL, OK, and PA.
